(818) 288-4761

I truly want to work in high-caliber, high-impact teams that want to make a positive difference in the world. In doing so, I hope to investigate, implement, and contribute to new technologies and ideas. I'm a big believer in the open source community, access to quality education and the pursuit of mental wellness.

## Skills

- Full-stack web development, OOP / functional, MVC design, RESTful, version control, agile development;
- Ruby / Rails, Javascript, Python / Django; SQL databases;
- Experience with PHP, JAVA, C++, SAS, NoSQL databases;
- Knowledgeable in caching, queueing, APIs, cross-browser design and mobile design;
- Defining the scope of projects; driving projects to completion; interacting in teams; meeting deadlines;
- Excellent written and verbal communication.

## Experience

**Dia&Co**, New York, NY (www.dia.com)                              Sep 2016 – Present
Senior Full-Stack Engineer. Dia&Co is a subscription service pioneering personal styling for plus-size women. Responsibilities include developing warehouse workflows for more efficient packaging, improvement and maintenance of our warehouse maintenance system, growth hacking social media to grow our user base.

**BrainFall**, Berkeley, CA (www.brainfall.com)                     Aug 2006 – Present
Co-founder & CTO. Project is an online personality site targeted towards high school and college students. Goals include increasing site "stickiness", premium and interactive content, and growth through viral marketing. Specific experience in full-stack web development, hiring and managing writers, and evaluating new projects.

**HowAboutWe,** Brooklyn, NY                                        Oct 2013 – Oct 2014
Lead Software Engineer. HowAboutWe is a site aimed at helping people fall in love and stay in love through a better online dating experience. Responsibilities included overhauling message system and overall trying to increase profile matches and conversations.

**Anthill LLC,** San Francisco, CA                                  May 2012 – Nov 2013
Various roles and responsibilities. Clients include:
- **Hypelife Brands** – As the lead full-stack web developer, I help to develop and maintain 10+ sites for various brands and organizations. Responsible for front-end and back-end development, database design, server maintenance and deployment strategy.
- **FTWGroup –** As a consultant, assisted with design and development of web applications for nascent startups, helping to make and implement technological decisions. As the Ruby / Rails tech lead, responsible for planning and analysis of projects, as well as coordinating best practices for testing and deployment.

## Education

New York University
